I have loved colors for as long as I can remember. I always wanted to own every color in every form. Pencils, crayons felt tips, watercolor, acrylic etc. However, I was from a large family on a smaller than large family budget. I had to develop creative outlets for all of the creativity running amuck in my head.

To say I have a passion for it is an understatement, but my ability with manipulating color is superior. If you manipulate color correctly you can solve almost every visual problem.
