

ACRIMETAL[®] DTM LOW SHEEN DTM PRIMER/FINISH 310210

Light Industrial Direct to Metal Coating

Acrimetal[®] DTM is high-performance, rust inhibitive, interior/exterior, acrylic light industrial coating. Acrimetal[®] White Base may be used as a primer on bare metal for a variety of finishes or alone as a primer/finish system. It is suitable for previously coated metal, wood, and masonry surfaces in all bases. Deep and Neutral Base colors require a primer for optimal rust inhibition and adhesion.
